

THE PROBLEM

**Arguments happen in
group chats every day.**

Nobody tracks who was right.

- 💬 "I told you Bitcoin would crash!" — but nobody recorded it
- 🗣️ "I said Arsenal would win!" — no proof, no receipts
- 🔙 The argument dies. The prediction is lost forever.

THE SOLUTION

ToldYa Bot

A Telegram bot that automatically detects disagreements and turns them into trackable predictions.

- 🎯 Detects arguments automatically
- 📝 Creates structured bets with deadlines
- 📦 Resolves via group vote or real data
- 🏆 Tracks who's the best predictor
- 📄 **Free. No money — just bragging rights.**

HOW IT WORKS

Four panels. Zero friction.

PANEL 1

The Argument

Two people disagree about something in a group chat. Happens naturally.

PANEL 2

Bot Detects

ToldYa notices the disagreement and proposes a structured bet with sides and deadline.

PANEL 3

Pick Sides

Friends join in with inline buttons. No app needed — stays in the chat.

PANEL 4

Told Ya!

When deadline hits, bot reminds everyone. Vote or auto-resolve. Winner gets bragging rights.

KEY FEATURES

Built for real group dynamics

Auto-Detection

No commands needed. Bot watches the conversation and catches arguments as they happen.

17 Languages

Keyword detection across 17 languages. Bot UI in 7 languages. Works in any group.

Leaderboards

Win/loss stats per user. Group rankings. Bragging rights backed by data.

Zero Friction

No app. No account. Just add to a group and give read permission. Done.

MARKET OPPORTUNITY

950M+

monthly active Telegram users

200M+

active group chats

#1

messaging app in
50+ countries

0

passive argument
detection bots

COMPETITIVE LANDSCAPE

Nobody else does passive detection

PREDICTION MARKETS

Polymarket, Manifold

Separate app. Financial. High friction. Wrong audience.

✗ Not social, not in chat

BETTING BOTS

Various Telegram bots

Manual creation only. No detection. Often gambling-focused.

✗ No auto-detection

TOLDYA

@Told_Ya_Bot

Lives in the chat. Detects automatically. Social fun, not gambling.

✓ Passive + social + free

TRACTION

Live and iterating in production

TIMELINE

Mar 12 — First group · Mar 15 — First organic group · Mar 19 — AI cofounder onboarded · Mar 21 — 2 directories live · Mar 31 — Product Hunt launch

UNIT ECONOMICS

Extremely low operational costs

\$8

/month hosting

~\$0

/month LLM (free tier)

\$0

/user (free forever)

WHY SO CHEAP?

SQLite (no DB server) + Bun runtime (fast, low memory) + Free LLM tiers (MiMo/Kimi) + Hetzner VPS (\$8/mo). Scales to 1000+ groups before costs become meaningful.

Telegram-native growth

PHASE 1 — NOW

Direct Outreach

- Bot directories (2 live)
- Target group outreach
- Community seeding
- Channel announcement

PHASE 2 — APRIL

Product Hunt + Scale

- PH launch (Mar 31)
- Content marketing
- Admin outreach at scale
- Referral program

PHASE 3 — SUMMER

Viral + Retention

- Own ToldYa channel
- "I told you so" share cards
- Influencer partnerships
- 100 groups milestone

TECH STACK

Simple, fast, cheap to run

RUNTIME

Bun + TypeScript

Fast startup, low memory

DATABASE

SQLite

No DB server needed

AI

MiMo + Kimi A/B

Free LLM tiers

INFRA

Hetzner + Caddy

\$8/mo, blue-green deploys

A comic book style illustration of Superman standing on a rooftop, holding a glowing smartphone in his right hand. The phone screen displays a chat interface with the title 'CHAT-UP' and several messages. The background shows a cityscape at sunset or sunrise.

Told Ya.

We don't help you gamble.
We help you settle arguments.

Let's talk.
